

The AcousticPro1080P2 has a matte white surface with a 1.0 gain that provides excellent color neutrality for superb color reproduction along with wide diffusion uniformity. The angular weave material is designed to allow wall-speaker sound to breathe through the screen while eliminating the visual artifact known as moiré effect. The precision angled mesh of the material allows viewers to enjoy a visually superior presentation with strong color neutrality and artifact-free performance. The material is perfect for use with native 1080P projectors for home cinema and commercial applications.

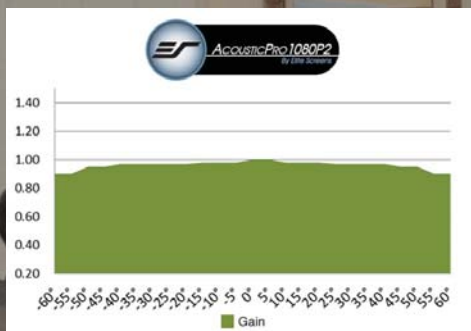

ACOUSTICPRO 1080P2
By Elite Screens

Elite Screen Series: ezFrame, Cinema235, Elite PrimeVision (Dream Window), Lunette

- Acoustically Transparent Matte White (angular weave)
- Gain: 1.0 / Viewing Angle: 160° (80° L/R)
- Superb off-axis luminance
- Optimal color neutrality; color shift is not compromised
- Designed for 1080P (1920x1080) projector resolutions
- Black backing eliminates backlighting artifacts from light bleed-through
- Mean attenuation of -2.05dB at 8k – 20kHz
